The George & Fay Yee Centre for Healthcare Innovation is hosting the CIHR STAGE (Strategic Training for Advanced Genetic Epidemiology) International speaker Monthly Seminar Series. This is a formal and comprehensive training program in Genetic Epidemiology and Statistical Genetics.

CIHR STAGE aims to expose trainees to high-calibre international research and foster a cohesive research community of genetic epidemiologists, statistical geneticists and bioinformatician in Canada through this series, and in the context of genetic epidemiology, statistical genetics and bioinformatics research.

This session will be offered via webcast (the live session will take place in Toronto).

Please submit any questions via email to pingzhao.hu@umanitoba.ca

Predictive ability of SLE genetic risk factors varies across ethnicities

Featuring:

Dr. Carl Langefeld
Professor, Department of Biostatistical Sciences
Co-Director, Bioinformatics Core, Wake Forest Comprehensive Cancer Center
