REDCAP SURVEYS & PRODUCTION SERVERS SECURE RESEARCH ENVIRONMENT (SRE) & SECURITY TOKEN

User Agreement

This agreement outlines the responsibilities of both the Applicant and Principal or Lead Investigator, or Student Advisor. You both must read, understand, and agree to use the REDCap system and/or Secure Research Environment (SRE) in accordance with the information and obligations listed below. Violation of any of the terms of the agreement could lead to suspension of your access privileges by the University of Manitoba and/or George & Fay Yee Centre for Healthcare Innovation.

PART I: Agreement for REDCap User Applicant

I agree to the following:

- An account on any of the REDCap servers is assigned to a specific individual and **cannot be shared**.
- All REDCap users must comply with any data management audits conducted by the University of Manitoba Research Quality Management or similar units.
- The Surveys and Production Servers may only be used for research projects that have been approved by the University of Manitoba Research Ethics Board (REB). Data for clinical care cannot be stored on REDCap.
- Protected Health Information (PHI) and other forms of personal identifiers, such as patient/subject names, addresses, and Personal Health Information Numbers, cannot be stored on the REDCap Surveys Server. However, PHI and other forms of personal identifiers may be stored on the REDCap Production Server if REB approval for doing so has been granted.
- Data may be transferred from the REDCap Surveys Server to the Production Server but data may not be transferred from the Production Server to the Surveys Server.
- Data, including de-identified data, may only be exported from these REDCap servers onto devices approved by MedIT, the Rady Faculty of Health Sciences IT group. Hardware encrypted drives are highly recommended for storage of data exported from REDCap.
- PHI may only be exported from REDCap if approval has been provided by the University of Manitoba REB.
- All data using REDCap must be treated as personal and confidential.

PART II: Agreement for Principal Investigator, Lead Investigator, or Student Advisor

I agree to the following:

- Provide a copy of valid University of Manitoba REB approval letter for each project that will be housed on the REDCap Surveys or Production Server.
- Ensure that all REDCap users in my research team have appropriate access within each research project, as well as inform the Research Data Administrator/REDCap Lead when members of my research team no longer require their accounts. The REDCap access must be kept up to date as project personnel leave or change roles.
- Inform the Research Data Administrator/REDCap Lead of the date on which study data should be deleted, once this date is known.
- Inform the Research Data Administrator/REDCap Lead if an auditor from a sponsor and/or another institution has requested access to my REDCap research project.

PART III: Agreement for Secure Research Environment User

I agree to the following:

- The SRE account and security token are assigned to a specific individual and cannot be shared.
- **Fee for a security token is \$150 plus applicable taxes/year and will be billed at the time of security token issue based on the remaining life of the security token. A security token may be active for up to 3 years.**
- The security token can be transferred to a new user at no cost, as long as it is transferred to another team member within the same research project. The new user is required to submit the REDCap Surveys & Production Servers and SRE application form and required supporting documents to redcap@umanitoba.ca.
- If a security token is lost and a new one is required, the security token will be billed at the rate of \$150 plus applicable taxes/year for the remaining life of the security token.
- To return a security token, please send your request to redcap@umanitoba.ca. There are no refunds for returned tokens.
